About Skills Network Cloud IDE

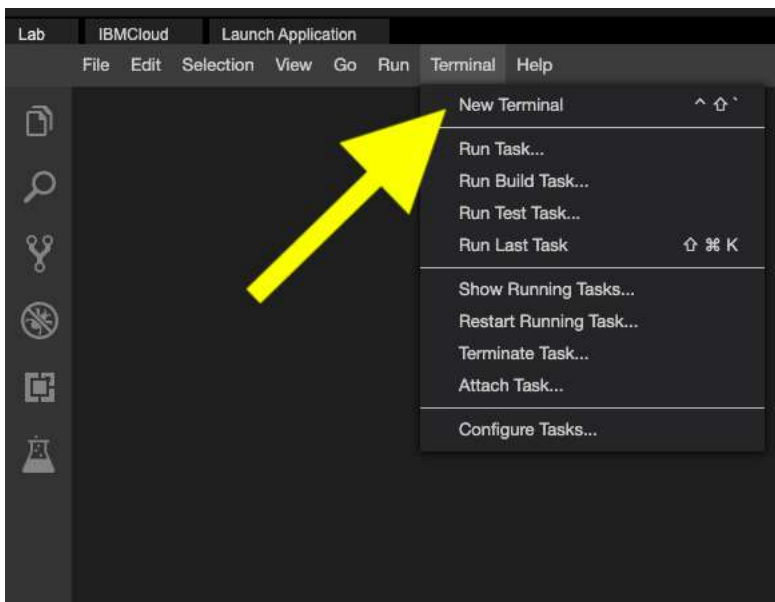

Skills Network Cloud IDE (based on Theia and Docker) provides an environment for hands on labs for course and project related labs. Theia is an open source IDE (Integrated Development Environment), that can be run on desktop or on the cloud. to complete this lab, we will be using the Cloud IDE based on Theia running in a Docker container.

Important Notice about this lab environment

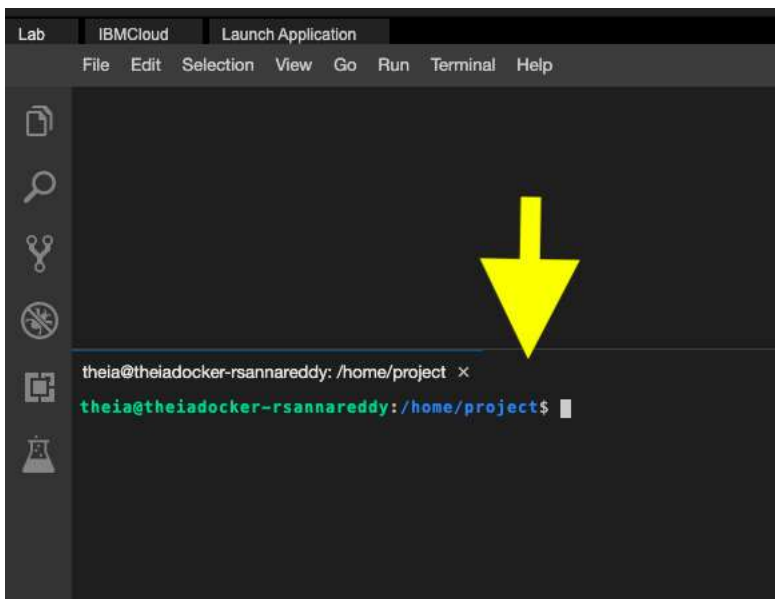

Please be aware that sessions for this lab environment are not persistent. A new environment is created for you every time you connect to this lab. Any data you may have saved in an earlier session will get lost. To avoid losing your data, please plan to complete these labs in a single session.

Exercise 1 - Getting the environment ready

Step 1.1. Open a new terminal by clicking on the menu bar and selecting **Terminal->New Terminal**, as shown in the image below.

This will open a new terminal at the bottom of the screen.

Run the commands below on the newly opened terminal. (You can copy the code by clicking on the little copy button on the bottom right of the codeblock below and then paste it, wherever you wish.)

Start Apache Airflow in the lab environment.

```
start_airflow
```

Please be patient, it will take a few minutes for airflow to get started.

When airflow starts successfully, you should see an output similar to the one below:

```
theia@theiadocker-rsannareddy:/home/project$ start_airflow
Starting your airflow services....
This process can take a few minutes.

Airflow started, waiting for all services to be ready....

Your airflow server is now ready to use and available with username: airflow password: MTM4OD
UtcNhhm5h

You can access your Airflow Webserver at: https://rsannareddy-8080.theiadocker-5-labs-prod-th
eiai8s-4-tor01.proxy.cognitiveclass.ai

CommandLine:
• List DAGs: airflow dags list
• List Tasks: airflow tasks list example_bash_operator
• Run an example task: airflow tasks test example_bash_operator runme_1 2015-06-01
theia@theiadocker-rsannareddy:/home/project$
```

UI URL Username Password

Step 1.2. Open the Airflow Web UI

Copy the Web-UI URL and paste it on a new browser tab. Or you can click on the URL by holding the control key (Command key in case of a Mac).

You should land at a page that looks like this:

```

Submitting a DAG is as simple as copying the DAG python file into `dags` folder in the `AIRFLOW_HOME` directory.

Step 2.3. Open a terminal and run the command below to submit the DAG that was created in the previous exercise.

```
cp dummy_dag.py $AIRFLOW_HOME/dags
```

Step 2.4. Verify that our DAG actually got submitted.

Run the command below to list out all the existing DAGs.

```
airflow dags list
```

Verify that `dummy_dag` is a part of the output.

Step 2.5. Run the command below to list out all the tasks in `dummy_dag`.

```
airflow tasks list dummy_dag
```

You should see 3 tasks in the output.

Exercise 3 - Search for a DAG

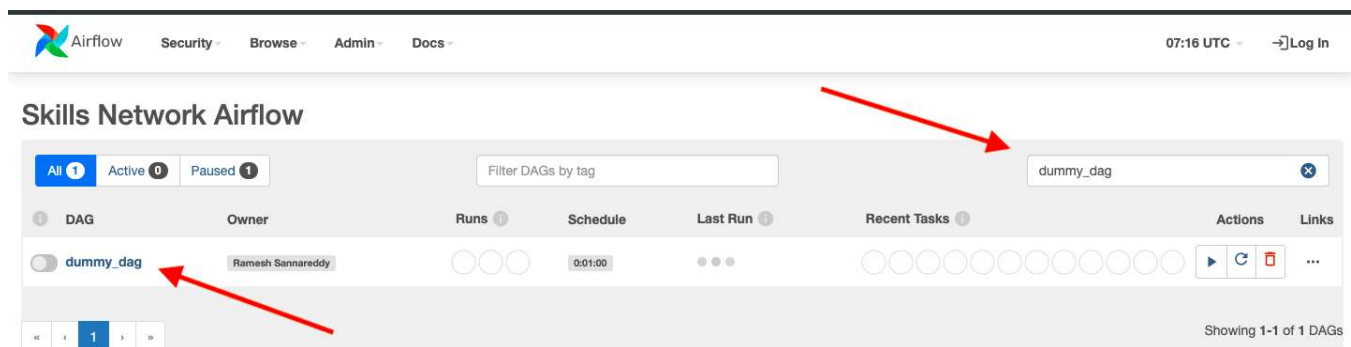

In the Web-UI, identify the `Search DAGs` text box as shown in the image below.

Type `dummy_dag` in the text box and press enter.

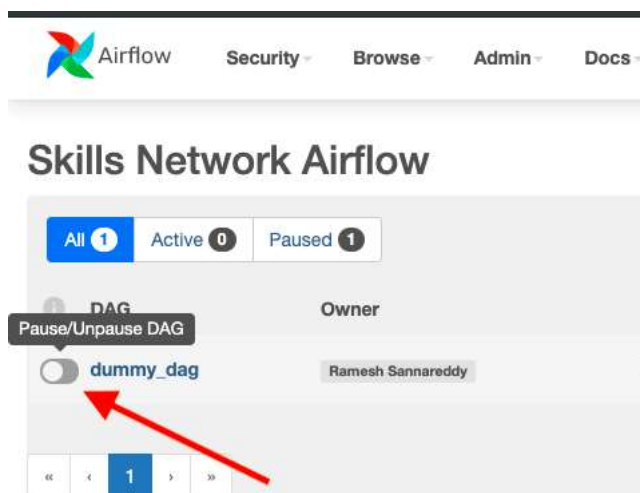

Note: It may take a couple of minutes for the dag to appear here. If you do not see your DAG, please give it a minute and try again.

You should see the `dummy_dag` listed as seen in the image below:

Exercise 4 - Pause/Unpause a DAG

Unpause the DAG using the Pause/Unpause button.

You should see the status as shown in the image below after you unpause the DAG.
